EUROPE

**COVID-19 can remain active
on surfaces for up to
seven days!**

ABOUT

The COVID-19 pandemic has ravaged not only countless lives but it has also essentially changed our world forever.

In a world locked by fear of a hidden enemy we are basing our salvation on a future rushed COVID-19 vaccine without even know it's effectiveness or potential side effects.

In the clinical setting we are using copious amounts of PPE and dangerous chemicals to disinfect in an effort to mitigate transmission risk.

We know touch transmission in the environment is also a serious threat. So how do we protect ourselves and society against this risk.

microSURE has part of the overall solution.

Getting back to work!

Businesses are now preparing for the new measures that will be required post Covid 19 lock down.

Customers and staff alike want assurance that companies will provide a clean and safe work environment.

But how can any business do this at a reasonable cost?

Regular disinfection is not an effective strategy

Traditional commercial disinfection services using hospital grade disinfectant can eliminate viruses, bacteria, and mould. While this is effective as a short term measure, these treatments do not offer any ongoing long term protection against re-infection.

microSURE is a brand new long lasting surface treatment for mechanically killing dangerous pathogens and viruses.

The FDA has categorised microSURE as a 'medical device'. microSURE is also EPA approved.

Approved and trusted by companies world wide including:

microSURE™

ALL PURPOSE
CLEANER AND DISINFECTANT

microSURE is a new mechanically modified medical device surface treatment that prevents adhesion, disrupts microbial communication and prohibits colonization, reproduction and proliferation.

Microbes that are unfortunate enough to come into contact with our microSURE modified surface, exhaust themselves, wither and die. Unlike traditional disinfectants, microSURE remains in place long after you apply it.

- Virucidal
- Bactericidal
- Fungicidal
- Eliminates Mold
- Eliminates Algae
- Bleach-Free
- Alcohol-Free
- Ammonium-Free
- No Added Dyes
- No Added Fragrances

- CAN BE USED ON HARD AND SOFT SURFACES

Our microSURE treatment won't break the bank

Typically, disinfection services can only provide up to 72 hours protection between treatments, causing more disruption and added cost to your business.

Our new microSURE treatment is different. It not only completely eliminates the bio threat, but it also remains active in killing any re-infection post treatment for up to **90 Days**.

For ongoing protection of contact surfaces or high traffic 'touch points' the treatment can be topped up by local staff every 4 to 6 weeks, or as needed.

Our treatment forms a long-lasting covalent bond with the applied surface which can only be removed by abrasion.

microSURE is available
in the following sizes

microSURETM
ALL PURPOSE
CLEANER AND DISINFECTANT

5 Litre Jug

200 Litre barrel

1,000 Litre Tote

DIRECTIONS FOR USE

GENERAL DIRECTIONS:

On a clean dry surface, apply enough solution to adequately cover the target surface by using spraying application of your choice.

GENERAL CLEANING:

Spray targeted area and let dry.

DISINFECTING, DEODORIZING:

Pre-clean surface before application of product.

Apply product with a hand pump trigger sprayer, low pressure coarse sprayer, or preferred applicator of choice.

Hold sprayer six to eight inches from the surface to be treated. Spray area until it is adequately covered with the product.

No scrubbing necessary. Allow treated surfaces to air dry.

INDOOR SURFACES:

Walls / Ceilings: Apply every 3 months, or earlier if needed.

Floors, rails, stairs, furniture:

Apply every 3-6 weeks depending on frequency of human contact.

OUTDOOR SURFACES:

Building walls: Apply every 6 weeks to 3 months, or earlier if needed.

Sidewalks, outdoor furniture, etc.:

Apply every 3-6 weeks depending on weather conditions, foot traffic and frequency of human contact.

IMMUNITY

SOCIAL SAFETY

APPLICATION NOTES

COVERAGE:

On a clean dry surface, apply enough solution to adequately cover the target surface by using Immunity electrostatic Sprayer system as they provide better coverage by wrapping 360 on all surfaces whilst be far more efficient in terms of agent usage.. The table below provides an estimate of coverage. Please consult your equipment supplier for more detailed information.

IMMUNITY ELECTROSTATIC SPRAYER	
Tank Capacity	10 Liters
Coverage in Square Meters per Liter	90-130
Working Time	3.5 Hours
Effectivity Range	12/14 Meters

INDUSTRY APPLICATIONS

- Buildings
- Commercial
- Retail
- Corporate
- Education
- Food Service
- Government
- Healthcare
- Janitorial / Cleaning
- Transportation
- Fleet / Delivery
- Professional Sport
- Entertainment
- Sales Teams
- Hospitality
- Equipment

microSURE™

Laboratory Tested & Approved

Citation: Bio Safety Laboratory testing: Using Microbioshield Protectant as a Surface Cleaner and antimicrobial agent, testing completed at FDA/CDC approved Laboratory. Results published on October 27, 2014.

Controlled Bacteria

- Acinetobacter calcoaceticus
- Aeromonas hydrophilia
- Bacillus cereus
- Bacillus subtilis
- Bacillus typhimurium
- Brucella abortus
- Brucella canis
- Brucella suis
- Burkholderia cepacia
- Citrobacter diversus
- Citrobacter freundii
- Clostridium difficile (non-spore form)
- Clostridium perfringens
- Corynebacterium bovis
- Corynebacterium diphtheriae
- Enterobacter aerogenes
- Enterobacter agglomerans (I, II)
- Enterobacter cloacae
- Enterococcus
- Enterococcus faecalis
- Escherichia coli
- Haemophilus influenzae
- Haemophilus suis
- Klebs-Löffler bacillus
- Klebsiella oxytoca
- Klebsiella pneumoniae
- Klebsiella terrigena
- Lactobacillus acidophilus
- Lactobacillus casei
- Legionella pneumophila
- Leuconostoc lactis
- Listeria monocytogenes
- Micrococcus species
- Micrococcus lutea
- Morganella morganii
- MRSA, CA-MRSA
- Mycobacterium smegmatis
- Mycobacterium tuberculosis
- Propionibacterium acnes
- Proteus mirabilis
- Proteus vulgaris
- Pseudomonas aeruginosa
- Pseudomonas cepacia
- Pseudomonas fluorescens
- Salmonella choleraesuis
- Salmonella enterica
- Salmonella typhi
- Salmonella typhimurium
- Serratia liquefaciens
- Serratia marcescens
- Stachybotrys chartarum
- Staphylococcus aureus
- Staphylococcus epidermidis
- Streptococcus faecalis
- Streptococcus mutans
- Streptococcus pneumoniae
- Streptococcus pyogenes
- Vancomycin-resistant enterococci
- Xanthomonas campestris

Controlled Algae

- Anabaena cylindrica
- Chlorella vulgaris
- Chlorophyta (green)
- Chrysophyta (brown)
- Cyanophyta (blue-green)
- Gonium species
- Oscillatoria borneti
- Pleurococcus
- Protococcus
- Scenedesmus quadricauda
- Selenastrum gracile
- Volvox species

microSURE™

Laboratory Tested & Approved

Controlled Viruses

- Adenovirus Type II
- Adenovirus Type IV
- Bovine Adenovirus Type I
- Bovine Adenovirus Type IV
- Feline pneumonitis
- H1N1
- H3N2
- Herpes Simplex Type I
- Herpes Simplex Type II
- HIV B
- HIV-1 (AIDS)
- Influenza A (Japan)
- Influenza A2 (Aichi)
- Influenza A2 (Hong Kong)
- Influenza B
- Parinfluenza (Sendai)
- Poliovirus
- Reovirus Type I
- *SARS*

**Note that the above virus listed as SARS was also tested and found to be unsuccessful at infecting the controlled pre-treated Microbioshield samples. The reason this test result is so significant is because not only is this another virus that caused an epidemic in 2002 but it is also a member of the Coronavirus family, as is the highly infectious (COVID-19) that we are struggling to combat today.*

- Simian Virus 40
- Vaccinia

FDA/CDC lab results from this study once again proved that the solution prevented colonization and growth of all infectious microorganisms.

Certifications:

FDA
EU
UAE
UK
IRELAND
Certified Organic (OMRI)
Shari'ah Compliant

Controlled Fungi

- Alternaria alternata
- Aspergillus flavus
- Aspergillus fumigatus
- Aspergillus niger
- Aspergillus terreus
- Aspergillus versicolor
- Aureobasidium pullulans
- Bipolaris australiensis
- Candida albicans
- Candida parapsilosis
- Cephalascus fragans
- Chaetomium globosum
- Cladosporium herbarum
- Clonostachys rosea
- Cryptococcus humicola
- Cryptococcus laurentii
- Dreschlera australiensis
- Epidermophyton floccosum
- Fusarium nigrum
- Fusarium solani
- Geotrichum candidum
- Gliocladium roseum
- Gliomastix cerealis
- Iternaris species
- Mariannaea elegans
- Microsporium audouinii
- Monilia grisea
- Mucor sp.
- Oospora lactis
- Penicillium albicans
- Penicillium chrysogenum
- Penicillium citrinum
- Penicillium elegans
- Penicillium funiculosum
- Penicillium humicola
- Penicillium notatum
- Penicillium variabile
- Pullularia pullulans
- Rhizopus nigricans
- Ricoderm species
- Stachybotrys atra
- Saccharomyces cerevisiae
- Trichoderma flavus
- Trichosporon mucoides
- Trichophytoninterdigitale
- TrichophytonMentagrophytes
